

## PROJECT > 1100 Millecento by Pininfarina

QUIKRETE® Mason Mix Portland Lime Type M Mortar,  
QUIKRETE® Core Fill Grout  
Miami, FL

### PROJECT DESCRIPTION:

Located in one of the most exclusive areas of Miami, 1100 Millecento is a 42-story, 382-unit luxury high-rise condominium inspired by Italian premium automobile designer, Pininfarina, and crafted by world-renown architect, Carlos Ott. The combined contribution of Pininfarina and Ott elevated 1100 Millecento to a new level of residential sophistication that includes a pool with club room, state-of-the-art, fitness center and private theater on the 9th floor, and a rooftop infinity pool with private cabanas. Romo Block laid approximately 120,000 blocks using QUIKRETE® Mason Mix Portland Lime Type M Mortar and J&M Glazing installed posts for the glass balconies in each unit using QUIKRETE® Core-Fill Grout.

QUIKRETE® Type M Mason Mix is a 2500 PSI, high strength commercial grade mortar. The pre-blended mixture contains specially graded sand, hydrated lime and cements specially designed for building and reinforcing walls made of brick, block or stone. It meets the requirements of ASTM C270 type M. Type S and N formulations are also available.

QUIKRETE® Core-Fill Grout is a properly proportioned mixture of Portland cement, graded sand, and other ingredients designed to provide a flowable grout requiring only the addition of water. It's available in coarse or fine versions.

**GENERAL CONTRACTOR:** Plaza Construction  
**SUBCONTRACTOR:** Romo Block, J&M Glazing
