## Conquer Your Fear of Concrete

Funny how some of the most doggone-it-let's-do-this DIYers seize up when it comes to concrete projects. Wide-eyed, they back away from the float, fearing that the job is too difficult and better left to professionals.

Quikrete is not in the mental health business, but they've developed [26 self-help videos](#) that will be breakthrough therapy for folks with a phobia about concrete. The videos cover such projects as:

- [Pouring and finishing concrete slabs](#)
- [Setting posts without mixing](#)
- [Building deck footings](#)
- [Resurfacing concrete slabs](#)
- [Building a block wall](#)
- [Repairing and sealing cracks in concrete](#)
- [Anchoring handrails and bolts in concrete](#)

Quikrete complements each video with [written instructions](#), for those who like step-by-step details, as well as a [quantity calculator](#) and a [shopping list](#) for the entire project.

**Self-help videos**

*for conquering your fear of concrete.*
