

PROJECT > Ft Jackson Concrete Sink Basins

Hardeeville, South Carolina

PROJECT START DATE:

Spring 2008

PROJECT COMPLETION DATE:

Fall 2010

PROJECT DESCRIPTION:

QUIKRETE® Concrete Countertop Mix was used to construct 62 concrete sink basins at Ft. Jackson Army Base using a precast construction method.

QUIKRETE® Concrete Countertop Mix is a self-consolidating flowable concrete that reduces the need for mechanical vibration. Concrete Countertop and sink forms can be removed in 18 hours, allowing for rapid installation.

Concrete Countertop Mix can be used in pre-cast or poured-in-place application and is available in gray or tint-base white.
