

PROJECT > Construction of New Stadium

Phillies Stadium, Philadelphia, PA

PROJECT DURATION:

14 months

PROJECT COMPLETION

DATE: 2004

PROJECT DESCRIPTION:

When Philadelphia went to build its new home for the Phillies, they turned to masonry contractor Dan Lepore & Sons, and Dan Lepore & Sons turned to QUIKRETE® for their mortar, grout and mortar color needs. Our ability to custom blend mortar color ensured that an exact “Phillies Red” match would be achieved. Supported by our Technical Center and laboratory in Atlanta, GA all colors are blended to specifically match each job. Our technical facility also tests the mortar and grout batches to ensure product consistency. With QUIKRETE® products Dan Lepore & Sons were guaranteed the highest performance and with a manufacturing plant in the Philadelphia area product could be delivered 24 hours a day if needed. With over 80 manufacturing facilities, QUIKRETE® can deliver locally to almost anywhere in the United States, Canada, and Puerto Rico.
