

## PROJECT > The Shops at Summerlin

Deck Mud  
Las Vegas, NV

### PROJECT DESCRIPTION:

The Shops at Summerlin, one of the premier regional mixed-use development sites in the U.S., is part of an urban center that serves the entire Las Vegas Valley with over 125 shops and restaurants in an open-air shopping environment. When the entire development is complete, it will include retail, entertainment, office and multi-family residences, designed to create a vibrant, walkable downtown in the heart of the affluent 22,500-acre master planned community. Superior Tile chose QUIKRETE® Deck Mud to lay thousands of square feet of high-end designer large format tile throughout the initial phase of The Shops at Summerlin. The low-sag and minimal

shrinkage associated with the medium bed QUIKRETE® Deck Mud gave the contractor confidence that the tiles would have lasting bond reducing call-back issues.

QUIKRETE® Deck Mud is a leveling mortar designed for interior or exterior underlayment, for all types of paver, tile, and marble installations on floors and counter tops. Adding QUIKRETE® Acrylic Fortifier to the Deck Mud is recommended for applications from 1/2" to 1 1/2".

**CONTRACTOR:** Dal-Tile

**SUB-CONTRACTOR:** Superior Tile
