

PROJECT > The Villages Regional Hospital

QUIKRETE® Base Coat Stucco – Pump Grade

The Villages, FL

PROJECT DESCRIPTION:

Located in America's largest retirement development, The Villages Regional Hospital (TVRH) has been serving patients in Lake, Sumter and Marion Counties since 2002 and in that time it has earned The Joint Commission's Gold Seal of Approval™ for healthcare quality and safety in hospitals. Driven to maintain a high-standard of care and service, TVRH underwent a \$50 million expansion that doubled the size of the

emergency department, added operating and treatment rooms, and increased acute hospital bed capacity to 323. The additions of a five-story tower and two wings required more than 105,000 square-feet of QUIKRETE® Base Coat Stucco – Pump Grade. Corona Construction spray-applied 350 3,000-pound bulk bags of stucco in a 7/8" three-coat scratch and brown application over OSB (oriented strand board) using a silo delivery system, which proved invaluable with the tight work space on the jobsite.

QUIKRETE® Base Coat Stucco – Pump Grade is a flowable, high workability plaster particularly designed for spray applications. It is a fiber reinforced Portland cement based stucco, designed to be used as the scratch and/or brown coat in a 3-coat stucco application, or the first coat in a 2-coat application.

CONTRACTOR: Wal-Mark

SUB-CONTRACTOR: Corona Construction

QUIKRETE® PRODUCTS:

- 3,000 lb QUIKRETE® Base Coat Stucco – Pump Grade: 350 bulk bags
