SHOTCRETE MS
No. 1229-80, Coarse (1229-82), Polypropylene Fiber Reinforced (1229-86), AR Fiberglass Reinforced (1229-83)
Dry process, micro-silica enhanced, pneumatically-applied, structural repair material

Applications:
• Tunnels
• Parking garages
• Ramps
• Bridge decks
• Piers/Beams
• Concrete pipes
• Tanks
• Mining

Product Features:
• Micro-silica enhanced
• High adhesion
• Very low permeability
• Improved sulfate resistance
• Low sag
• High build in a single pass
• Low rebound
• Fine & coarse mix designs
• Above or below grade

QUIKRETE® Shotcrete MS is a high strength structural repair material for vertical, horizontal and overhead concrete placed using the dry process shotcrete method. The material typically achieves more than 7,500 PSI at 28 days in field applications. QUIKRETE® Shotcrete MS is specially designed for above or below-grade repairs. The material can be applied over mesh, rebar and other structural reinforcement. Mix can be customized with fiber, corrosion inhibitors and color to meet project specifications.

YIELD:
• Each 80 lb (36.2 kg) bag yields approximately 0.61 CU FT (17.0 L) 42 bags per pallet
• Each 3000 lb (1361 kg) bulk bag yields approximately 22.5 CU FT (637 L)
